Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicants' response dated August 9, 2004, and the declaration of invention are received and entered. Accordingly, Examiner withdraws the claim rejection dated July 15, 2004.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Vasanaawala et al (US 6,307,368).

As regards to claim 1, Vasanaawala et al teach a method of reducing artifacts in steady state free precession (SSFP) signals for use in magnetic resonance imaging, including the steps of applying a plurality of SSFP imaging sequences to an object to be imaged to acquire image data for each of said sequences (columns 4-9). Vasanaawala et al further teach weighting the image data to emphasize higher signals, and combine the weighted data to establish an image signal based on the combined weighted image data (figures 4 and 8-11; column 4 and 5, lines 63-67 and 1-12, column 6 and 7, lines 25-64 and 1-59, column 8, lines 1-30; each of these figures show various ways of weighting the image data to establish an image signal).

As regards to claims 2, 11 and 12, Vasanaawala et al further teach use of phase-cycled SSFP imaging sequences, and having two and three dimensional sequences for imaging (column 7 and 8, lines 31-67 and 1-67, figures 12-14).

Allowable Subject Matter

3. Claims 3-10 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brij B Shrivastav whose telephone number is 571-272-2250. The examiner can normally be reached on 7 AM to 4 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diego F. F. Gutierrez can be reached on 571-272-2245. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
